EDUCATION

IEC College of Engineering and Technology **2023 – 2027**
B.Tech, Computer Science (AI & ML) **CGPA: 7.8**
Dr. Virendra Swarup Education Centre -Higher Secondary (XII, PCM) **2022-2023**
Dr. Virendra Swarup Education Centre - Secondary (X) **2020-2021**

TECHNICAL SKILLS

Languages: Python, C++, SQL

AI/ML & GenAI: Generative AI, LangChain, LangGraph, RAG, LLM Integration, Prompt Engineering, Machine Learning, NLP, Pydantic, NumPy, Pandas, Matplotlib

Web & Data: React.js, Next.js, HTML5, CSS3, Tailwind CSS, FastAPI, REST APIs, PostgreSQL

Tools & Cloud: Git, GitHub, Docker, AWS, GitHub Actions (CI/CD), Postman, Cursor, Claude, Gemini CLI, GitHub Copilot

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, System Design

EXPERIENCE

Nickelfox Technologies — AI Intern **Mar 2026 – Jun 2026**

- Built and optimized **machine learning models** in Python: data preprocessing, feature engineering, training and evaluation against business requirements.
- Performed **data analysis and cleaning** to improve data quality and make model development more reliable.
- Tested models with relevant performance metrics and identified concrete optimization opportunities.

PROJECTS

AI Portfolio Analyzer | *Python, React.js, Node.js, LLMs, REST APIs, FinTech*

- Built a **responsive React.js dashboard** rendering **10+ portfolio metrics** with interactive charts and real-time updates.
- Engineered a **Node.js REST API** with **Jest unit tests** that processes market data and generates **LLM-powered risk scores** and allocation recommendations.

AI Banking Assistant & Fraud Detection | *Python, FastAPI, LangChain, RAG, PostgreSQL, Docker*

- Built a **RAG-based banking assistant** with LangChain that answers customer queries on accounts, loans and bank policies, grounded in policy documents to reduce hallucinations.
- Trained an **ML fraud-detection model** on transaction data (feature engineering, class-imbalance handling) to flag suspicious activity with precision/recall evaluation.
- Exposed the system through **FastAPI** services with Pydantic validation and a PostgreSQL store; containerized with **Docker**.

AI HR Automation Agent | *Python, LangGraph, FastAPI, Next.js, PostgreSQL, GitHub Actions*

- Designed a **multi-step LangGraph workflow** that automates resume screening, candidate ranking against job descriptions, and interview scheduling.
- Used **LLMs with Pydantic-structured outputs** to parse resumes and draft offer/onboarding emails, with a human-in-the-loop approval step before sending.
- Built a **Next.js dashboard** for recruiters and set up **CI/CD with GitHub Actions** for automated testing and deployment.
